INSTRUMENTS AND CONTROL SYSTEMS

INDEX TO VOLUME 44, 1971

This index is a guide to titles, authors, and subjects of articles published during 1971. Indices to featured and advertised products appear in each monthly issue.

Note: numbers in boldface type refer to the month of issue, followed by the page number.

SUBJECT

Acoustic 4:30, 93; 9:15; 10:98; 11:25, 103
Analog 1:12, 77; 2:99; 3:129; 4:16, 84, 141, 100; 7:108
Analytical 1:66, 81; 2:113; 3:25, 110; 7:91; 10:47, 80, 103; 11:21, 29
Calibration 3:11, 133; 4:101; 8:113; 9:81; 9:29
Communications 1:91; 9:14; 9:43; 11:42, 103
Components 1:13; 2:12, 113, 124; 3:12, 97, 119; 4:7, 15, 93, 115, 120, 124, 133; 5:21, 25, 75, 103, 113; 6:17, 25, 28, 81, 97; 7:24, 8:25, 45, 48; 9:27, 35, 40, 87, 95, 99; 10:31, 47, 48, 95; 11:41, 89; 12:38,140
Computer 1:4, 8, 87, 92, 98; 2:4, 17, 20, 124, 3:4, 18, 97, 101, 111, 115; 4:28, 32, 41, 122, 139; 5:18, 39, 69, 75, 81, 93, 97, 9:21, 28, 125, 129, 133; 7:4, 43, 8:4, 18, 35, 39, 91, 97, 102; 9:13, 113, 120; 10:4, 16, 29, 107; 11:4, 15, 27, 82; 12:13, 21, 34, 77, 80
Control 1:8, 77, 81, 96; 2:11, 12, 17, 20, 104, 107; 3:4, 16, 18, 97, 115; 4:7, 28, 30, 32, 41, 138; 5:7, 16, 21, 39, 69, 75, 81, 85, 93, 106; 6:7, 21, 26, 97, 133; 7:16, 24, 29, 33, 43, 96, 8:9, 18, 31, 35, 44, 83, 87, 95, 99, 113; 10:11, 15, 16, 25, 27, 29, 52, 95; 11:9, 15, 16, 25, 27, 41, 44, 75, 89, 95, 109; 12:12, 16, 21, 31, 34, 40, 69, 77
Data 1:4, 84; 2:4; 3:4, 124; 4:4, 5:4, 89; 9:125; 7:4, 69, 95, 91, 100; 8:87; 9:4, 105, 109; 11:4, 76, 103; 12:84
Digital 1:8; 2:4; 3:101; 5:7, 14, 85, 89; 7:46; 9:13; 10:107; 11:42, 75, 82; 12:13, 37, 80
Display 1:92; 5:7, 14; 8:14; 7:46, 69; 9:113
Electronic 1:12; 2:93, 99, 104; 3:11, 129, 133; 4:15, 16, 120, 124, 129; 5:21, 25, 41, 100, 110; 7:13, 24, 100; 8:45, 46; 9:27, 40, 83, 89; 10:47, 48, 77, 95; 11:13, 29, 42, 89; 12:15, 38, 84

ACCURACIES TO 0.05%

All Solid State

As low as $595.00

DIGITAL TEMPERATURE INDICATORS °C or °F

Thermocouple, RTD, or Thermistor Sensors

- Full range of models for digital indication of temperature from −180°C to +1750°C and comparable "F" ranges.
- Resolutions as great as 0.01°—accuracy from 0.05%.
- Thermistor, RTD or Thermocouple probes to suit application and range—up to 10 switch selected probes. Complete systems available with Scanner, Sequencer and Printer.
- 3 or 4 decade, non-blinking ⅝" Nixie Tube readouts.
- Direct reading with automatic polarity sign and overrange.
- Full selection of options.

New precision control for 1/8 HP motors

The Heller S18T... only $214.50

Accuracy of motor speed control within 0.5% over an infinitely variable speed range of 120/1 is provided by the new Heller S18T solid state controller and powerful Heller 10T ⅛ HP d-c motor with internal tachogenerator. Pre-set speed is maintained in spite of load changes from 0 to more than 100%, fluctuations in 50-60 Hz a-c power source between 105 and 135 volts, and ambient temperature changes between 60° and 120°F. 6½" x 9" x 6½" sloping front cabinet with magnetic circuit breaker, forward-stop-reverse switch, 10-turn speed control potentiometer, speedmeter. Motors include Heller 10T non-geared at $78.00, 10T worm gear in ratios from 10 to 36/1 at $102.00, and 10T in-line geared from 57 to 524/1 at $106.00.

meet the gauges that beat the killers...
PULSATION, VIBRATION AND CORROSION

GLYCERIN FILLED PRESSURE GAUGES

- All moving parts of WIKA gauges, including the sensitive Bourdon tube are immersed in pure glycerin
- Squelches strong pulsations and withstands severe vibrations
- Non-petroleum base, glycerin eliminates possibility of sludge
- O-Ring sealing and glycerin prevent condensation in any atmosphere
- Glycerin gauges have out-performed all other types in giving longer life and accurate readings
- Sizes from 2½" to 6", with connection and Bourdon tube in brass, steel or S.S.
